TWIN COIL FOR SOLAR
THERMAL

AquaFlow Twin

Unvented twin coil water cylinder

Inner shell guaranteed for 25 years, made from Super-Molybdenum.

Cylinder manufactured from high grade corrosion resistant stainless steel.

Install the Aquaflow Twin with a Zenith Solar thermal system and a system or regular boiler to benefit from Solar thermal energy

Internal secondary expansion via self generating air gap means no expansion vessel required, or fully flooded cylinder with an expansion vessel.

Balanced cold water supply point.

Secondary return facility on all units as standard.

No need for 'sacrificial anode' due to excellent anti-corrosion properties of Super-Molybdenum.

No cold water feed tanks required means a dry roof space.

Twin coil units are supplied with one low level immersion heater factory fitted and hard wired complete with surface mounted thermostat.

Twin coil cylinders have two thermostats, upper for boiler heating and lower for Solar pre-heater.

SPECIFICATIONS	AquaFlow Twin 250	AquaFlow Twin 300
Unvented capacity	207 litres	239 litres
Approximate weight full	255kg	297kg
Flooded capacity	250 litres	300 litres
Approximate weight fully flooded	312kg	364kg
Height	1400mm	1600mm
Diameter	580mm	580mm

Install the Aquaflow twin coil water cylinder with a Zenith Solar thermal collector and system or regular boiler to benefit from renewable energy.

See the Vokèra Product Solutions catalogue for further information on Zenith Solar thermal collectors.
